

PUBLIC TRANSPARENCY REPORT

2023

Procuritas Capital Investors

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

We at Procuritas first and foremost engage in responsible investments because it is a core part of who we are and we want to contribute to a better society as part of what we do for a living. We also believe that this interest is strongly shared with our stakeholders; our investors are reputable institutions, demanding responsible investment practises. Also, this is of fundamental value to entrepreneurs looking to team up with Procuritas, to our portfolio companies' employees, as well as their customers, business partners, and institutions in our markets. We also believe it is crucial for us to be able to attract and retain talented people to our company. In short, we believe that responsible investment is a must for Procuritas to be successful in reaching our goals, both on personal value level and financially.

When we make investments and develop portfolio companies, we always strive to ensure that we do business with good people, who share our values. We take measures to limit risks of ESG nature, but probably more importantly, we implement changes to improve our companies with ESG responsibility as a guiding principle. We have classified our latest fund as an article 8 fund according to the EU regulation SFDR, which means that it promotes environmental and social characteristics. Even though not classified, all our funds promote environmental and social characteristics. We focus on three areas across portfolio: good governance, an attractive workplace and a planet in balance and within each of these we are committed to improve a number of sustainability topics, e.g. sustainability reporting, anti-corruption, gender balance, greenhouse gas emissions.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

During the year we hired a Head of ESG to be able to accelerate our activity within ESG. We have conducted a new materiality analysis which is the basis of our new sustainability strategy focusing on good governance, an attractive workplace and a planet in balance. We have started cooperation with a large number of ESG experts to ensure that we have access to relevant specialist competence whenever necessary.

To support our portfolio companies, we have developed a new materiality analysis tool including a goal setting template for our companies to use when determining where to focus their efforts. Our Head of ESG also provides our portfolio companies with ESG advisory related to any ESG challenges they might have.

We have further developed our sustainability report to include a lot more data than the previous version, data both covering Procuritas and our portfolio. We have also had a selected number of KPIs third party verified.

During the year we have also negotiated a number of ESG-linked loans. Each Procuritas investment has a bespoke financing structure tailored to the relevant investment case and ESG links or requirements are now included in several of these.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Based on the materiality analysis conducted during 2022 we have developed a new sustainability strategy, including goals and KPIs that will be monitored and followed up through the board work and through our yearly sustainability data gathering process in the years to come. To ensure a proper implementation of the strategy we will communicate our expectations on the portfolio companies, i.e. through the board work and through information sessions with our companies.

We will initiate a sustainability network for our portfolio companies in 2023 and will arrange a sustainability competition among our companies to be able to share knowledge and best practice examples within our portfolio.

The materiality analysis tool that we have developed will be implement in our portfolio i.e. through training sessions and support from our Head of ESG.
